PROFILE

Product Designer with 3+ years designing digital products end to end, from procurement platforms to ERP and CMS. Combines business analysis, UX/UI design, design systems and QA to turn complex requirements into shipped products with measurable impact.

EXPERIENCE

RYNDEM Studios, Cuernavaca, Mexico (CMMI Level 3 company)

Product Designer Jan 2025 – present

- Drove a B2B PunchOut platform end to end as lead analyst and product designer, connecting a distributor's catalog to its customers' procurement systems; designed and shipped in 1 month, it cut quote-to-order time by about 80% (ERP records)
- Designed a credit-note module for Mexico's tax authority (SAT): a three-step wizard for twelve tax scenarios
- Designed in 2 weeks an MVP that turns emails into tasks: 85 hi-fi screens with their rules documented
- Extended the ERP design system with component tokens and states as variants, with no visual changes
- Defined traceable requirements and acceptance criteria with business and engineering within CMMI Level 3 processes
- Integrated AI and MCP servers connected to Figma to prototype, document and audit, within Agile/Scrum teams

UX/UI Designer Apr 2023 – Dec 2024

- Led UX/UI design of a CMS that lets international suppliers sync their catalog with the ERP in real time, removing days of delay caused by a nearly 12-hour time difference; in production with 3 suppliers
- Built the CMS design system with Atomic Design: 117 components with 599 variants and 237 variables (104 primitives and 133 semantic tokens), versioned to scale to new suppliers
- Designed improvements to an internal sales ERP's quoting module (payment-term changes, controlled-product splits and research items) that reduced off-system quotes by about 40%
- Analyzed the full ERP and designed its adaptation for Peru: user experience, business rules and interface
- Designed and ran QA test cases based on Nielsen's heuristics and acceptance criteria before every release

Tools: *Figma, FigJam, Jira, Notion, Google Workspace, Claude, Claude Code, ChatGPT, Codex, Orca, Gemini, Stitch, NotebookLM*

EMECE, Remote

UX/UI Design Intern 2021

- Designed interfaces and digital materials remotely for several clients, including AMBA (armoring industry)

Tools: *Photoshop, Illustrator*

SKILLS

Design and prototyping: Figma, FigJam, Adobe Creative Cloud, Sketch, HTML, CSS

Methods: UX research, user flows, wireframes, hi-fi prototyping, responsive design, usability testing, design tokens, Agile/Scrum

AI: Claude, Claude Code, ChatGPT, Codex, Orca, Gemini, Stitch, NotebookLM, Figma AI, MCP integrations

Project tools: Notion, Jira, Google Workspace, Trello, Asana

Languages: Spanish (native), English (C1)

EDUCATION

Universidad Iberoamericana Puebla, Puebla, Mexico May 2021

Bachelor's Degree in Interaction Design and Animation

Certifications: Prompt Engineering (Platzi, 2026); AI for Designers (Interaction Design Foundation, 2025); Microsoft UX Design Professional Certificate (Coursera, 2025); Design Tokens master class (Interaction Design Foundation, 2024)
