PROFILE

Product Designer with UX/UI design experience since 2021 and 3+ years designing digital products end to end, from procurement platforms to ERP and CMS. Combines business analysis, UX/UI design, design systems and QA to turn complex requirements into shipped products with measurable impact.

EXPERIENCE

RYNDEM Studios, Cuernavaca, Mexico (CMMI Level 3 company)

Product Designer 2025 – Present

- Led a B2B PunchOut platform end to end as lead analyst and product designer, connecting a distributor's catalog to its customers' procurement systems; designed and shipped in 1 month, it cut time from quote to order by about 80%
- Defined requirements, flows and acceptance criteria with business and engineering stakeholders, and took each product through to production within CMMI Level 3 processes: traceable requirements, design reviews and verification before release
- Integrated AI tools into the design workflow to prototype, document and validate with engineering, within Agile/Scrum teams running sprint planning and design reviews

UX/UI Designer 2023 – 2024

- Led UX/UI design of a CMS that lets international suppliers sync their catalog with the ERP in real time, removing days of delay caused by a 12-hour time difference; in production with 3 suppliers
- Built the CMS design system with Atomic Design: 117 components with 599 variants and 237 variables (104 primitives and 133 semantic tokens), versioned to scale to new suppliers
- Designed improvements to an internal sales ERP's quoting module (payment-term changes, controlled-product splits and research items) that reduced off-system quotes by about 40%
- Contributed to adapting the ERP sales module for Peru, from stakeholder interviews through QA
- Designed and ran QA test cases based on Nielsen's heuristics and acceptance criteria before every release

Tools: *Figma, FigJam, Jira, Notion, Claude, Claude Code, ChatGPT, Codex, Gemini, Stitch, NotebookLM*

EMECE, Remote

UX/UI Design Intern 2021

- Designed interfaces and digital materials remotely for several clients, including AMBA (armoring industry)

Tools: *Photoshop, Illustrator*

SKILLS

Design and prototyping: Figma, FigJam, Adobe Creative Cloud, Sketch, Zeplin, HTML, CSS

Methods: Design Thinking, Lean UX, Atomic Design, design tokens, usability testing, QA testing, Agile/Scrum

AI: Claude, Claude Code, ChatGPT, Codex, Gemini, Stitch, NotebookLM, Figma AI, MCP integrations

Project tools: Notion, Jira, Trello, Asana

Languages: Spanish (native), English (C1)

EDUCATION

Universidad Iberoamericana Puebla, Puebla, Mexico May 2021

Bachelor's Degree in Interaction Design and Animation

Certifications: Prompt Engineering (Platzi, 2026); Microsoft UX Design Professional Certificate (Coursera, 2025); AI for Designers (Interaction Design Foundation, 2025); Design Tokens master class (Interaction Design Foundation, 2024)
